PROFESSIONAL SUMMARY

Passionate Software Engineering student with hands-on experience developing full-stack web applications, AI-powered systems, and scalable backend solutions using the MERN stack. Skilled in React.js, Node.js, MongoDB, MySQL, REST API development, and modern UI/UX practices. Strong foundation in Data Structures & Algorithms, software engineering principles, and problem-solving. Experienced in hackathons, AI-integrated projects, and collaborative development environments. Currently seeking a Web Development Internship or Junior Software Engineer role.

EDUCATION

Bahria University, Islamabad

Jan 2023 – Jan 2027

Bachelor of Science in Software Engineering

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Software Construction, Computer Networks, Human Computer Interaction, Software Design & Architecture, Artificial Intelligence, Cloud Computing, Software Quality Engineering

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, C++
- **Frontend:** React.js, HTML5, CSS3, Bootstrap, Vanilla JavaScript, Responsive UI Design
- **Backend:** Node.js, Express.js, RESTful APIs, Authentication & Authorization
- **Databases:** MongoDB, MySQL
- **Testing & QA:** Selenium, Pytest, API Testing, Manual Testing
- **Tools & Technologies:** Git & GitHub, Postman, Docker, Jira, VS Code, Figma, Vercel, Render
- **Core Concepts:** Data Structures & Algorithms, OOP, MVC Architecture, Agile Development, Software Design Principles

PROJECTS

Relaxa – AI-Based Mental Wellness Web Application

React.js, Node.js, Express.js, MongoDB

- Developed an AI-powered mental wellness platform using the MERN stack to help users manage stress and emotional well-being.
- Implemented mood tracking, wellness exercises, AI chatbot support, and mood analysis reports for personalized user experiences.
- Applied AI concepts including Breadth-First Search (BFS), A* Search Algorithms, and state-space modeling for intelligent stress-relief recommendations.
- Designed responsive frontend interfaces and scalable backend architecture with modern UI/UX principles.
- Live Demo: <https://relaxa-one.vercel.app>

CivicConnect – Smart City Resident Services Portal

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack Smart City Resident Services Portal during the AUREX AI 2026 Web Development Competition organized by MLSA BSEAS at Bahria University.
- Built modules for civic complaints, permit applications, service request tracking, public announcements, and event registrations.
- Implemented role-based dashboards for Residents, Department Staff, Department Admins, and Super Admins with secure authentication and request lifecycle tracking.
- Integrated analytics dashboards, SLA monitoring, reusable components, responsive UI/UX, and scalable backend APIs.

E-Commerce Toy Store Platform

Node.js, Express.js, MySQL, HTML5, CSS3, Vanilla JavaScript

- Developed a full-stack e-commerce platform featuring checkout workflows, order tracking, and an interactive review system with admin reply support.
- Designed RESTful APIs, relational database schema, CORS configuration, and environment management for scalable backend operations.
- Created a modern admin dashboard with glassmorphism-inspired UI for efficient product and order management.

Car Cruiser – Car Rental Management System

Java, MySQL

- Built a multi-role car rental management system with booking management, authentication, and complete rental history tracking.
- Applied core Data Structures concepts including stacks, queues, linked lists, and trees within application logic.
- Developed database integration and role-based functionalities for efficient rental operations.

EXPERIENCE & ACHIEVEMENTS

- Participated in university-level hackathons and AI-focused web development competitions.
- Developed multiple full-stack MERN applications with responsive UI/UX and scalable backend systems.
- Built AI-integrated applications using search algorithms and intelligent recommendation systems.
- Continuously practicing Data Structures & Algorithms and modern software engineering practices.
